## Light up your Life... with ION5™!

### BALANCE YOUR pH, HEAL YOUR BODY

Repairing your pH balance is the natural way to rebuild your health and initiate healing. Correcting an acidic body is essential to bringing the body back to good health. A healthy pH is the key to balancing other body systems, such as:

The Digestive System, The Circulatory System, The Immune System, The Respiratory System, The Skeletal System, The Integumentary System (skin), The Nervous System, The Excretory System, The Muscular System, The Reproductive System.

There are so many diseases and disorders that are associated with an acidic condition. With this awareness of how acidity can affect us, we can take a natural approach to balancing our body's pH through ION5™ and other Sparkle Wellness Products.

## ABSORPTION OF MINERALS:

Sparkle is on a crusade to help address the ongoing epidemic of mineral depletion, which is compromising the health of people worldwide.

Minerals are essential for total body wellness. Over 90% of all body functions require minerals. Without them, not a single muscle including your heart and brain could function. Also, research indicates that almost every ailment, sickness and disease can be traced to a mineral deficiency. If the body lacks vitamins, the body can still utilize minerals. But, if the body lacks minerals, vitamins are not properly utilized.

Unfortunately, for decades there has been an ongoing epidemic of mineral depletion in the soils, fruits and vegetables. This is compromising good health because the body cannot create its own minerals, we must obtain them through food or supplementation. Therefore, the biggest challenge with minerals is finding the proper balance in a form that can be readily absorbed by the body.

With so many types of minerals in the market today from organic, inorganic, colloidal, chelated, petrified vegetation, ancient organic sea beds to ionic, how do you know which is best? For years the debate has left people more confused than ever.

The truth is, the body cannot benefit from minerals unless the body can ABSORB them. Minerals that cannot be broken down by your body's natural ionic form pass through the body unassimilated, making them useless.

## THE GENERATIONS OF MINERALS:

- 1st Generation = Natural Mined Minerals
- 2nd Generation = Chelated Minerals
- 3rd Generation = Colloidal Minerals
- 4th Generation = A Combination of Minerals

Mined Minerals are proven to be ineffective due to their large particle size, which the body cannot fully absorb. The 2nd, 3rd, and 4th generation minerals were created through man-made processes to help transport minerals more effectively in the body. They must undergo a reconversion in the body before they can be utilized, then still the body's ability to absorb them is minimal to none.

## THE 5TH GENERATION MINERAL:

Through extensive research and development, Sparkle has discovered a 5th generation mineral that offers a better and more effective delivery system - we call it **ION5™**.

ION5™ is naturally in a LIQUID IONIC FORM and its minerals are smallest in size so it is naturally absorbed by the body immediately. In fact, ION5™ minerals are in a balance almost identical to the body's healthy blood plasma and lymphatic system. Therefore, ION5™ does not need any unnatural processes like other minerals in order to be assimilated.

ION5™ contains a natural concentrated blend of over 72 essential minerals and trace minerals, supercharged with our exclusive Energetics Technology™ - a subtle energy force that works on the same energetic principle as acupuncture and "ki" which influences the body on all levels - mental, psychological and physiological.
